Gary,

1. I have completed copying the CD but have forgotten to take them with me when going to town. I will put them in my truck today, will be in town tomorrow and mail them to you at that time.
2. We are working with the TCEQ to establish an acceptable remedial/corrective action priority list. Once this is completed you will be provided a copy.
3. IKON was on site yesterday collecting samples to be submitted to the disposal facility for profile. D. Askanase has been in contact with the potential purchaser; however, I am not aware of the current status.

Mickey

What is the status of the mailing of the CDs?

Also, please send me the schedule sent to TCEQ and the name of the realtor for the Brownstone Group.

Please let Mr Askanase know that EPA is making plans to get involved since there seems like no movement is happening to completely address site cleanup in a timely fashion. If we get involved, this will tie the property up for years with cleanup and liens. We would much prefer that he take advantage of the leveraged cleanup deal proposed by IKON and the sale of property to the Brownstone Group (as you informed). The will also allow the property to get back into productive use much more quickly.

Gary
